WORK EXPERIENCE

Full Stack Developer | Wolf Stack   **November 2022 - Present**
- Developed and maintained web applications using Flutter and ReactJs.
- Implemented backend services using Node.js and Firebase.
- Collaborated with cross-functional teams to define project requirements and deliverables.
- Conducted code reviews and provided mentorship to junior developers.
- Integrated third-party APIs and ensured seamless functionality.

Flutter Developer | Techdot IT   **August 2021 - November 2022**
- Designed and developed mobile applications using Flutter framework.
- Utilized state management solutions like GetX and Provider.
- Worked closely with UI/UX designers to implement responsive and user-friendly interfaces.
- Performed debugging and troubleshooting to optimize app performance.
- Assisted in deploying applications to Google Play and App Store.

Mobile & Web Developer | Freelancer   **June 2019 - Present**
- Created custom mobile and web applications for various clients.
- Employed technologies such as JavaScript, Dart, and SQL.
- Provided full-stack solutions, from frontend design to backend development.
- Managed version control using Git and collaborated with clients for continuous updates.
- Delivered projects within deadlines while ensuring high quality and client satisfaction.

PROJECTS

F-G-T GmbH | Mobile App + Admin Panel   **December 2023 - Present**
- Implemented address selection with dropdown menus for pre-inputted addresses.
- Developed category-based photo capture with 10 distinct categories.
- Ensured photos were timestamped and embedded with addresses.
- Enabled seamless Google Drive integration for automatic photo organization.
- Utilized cloud-based storage for real-time task status synchronization.
- Created an admin panel for managing addresses, categories, and generating reports.
- Incorporated Google Maps for live address fetching.
- **Technologies used: Flutter, Google Drive API, Google Maps API.**

Casarancha | Mobile App + Admin Panel   **March 2023 - Present**
- Developed an international community app with Flutter and Firebase.
- Implemented multiple authentication methods (Email, Google, Facebook, Apple, Phone).
- Created social feed, groups, group chat rooms, forums, direct chat, and ghost mode.
- Included features like ghost chat room and stories for enhanced user interaction.
- Ensured full encryption and user discretion.

Look4City | Mobile App | Freelancing Project   **December 2022 - November 2023**
- Designed an application to help users find optimal geographical locations for businesses, homes, and schools.
- Integrated features to provide location-based recommendations and insights.
- Delivered a user-friendly interface to enhance the user experience.
